

# CONTROL PANEL SERVICES

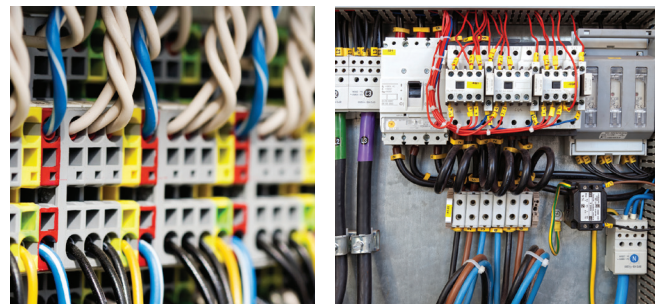

□ DESIGN & FABRICATION

E2i has been a systems integrator and **UL-certified CP/MCC fabrication authority** since 1990. Our team is comprised of the **highest quality designers and fabricators** and provides **custom solutions** to meet your specifications.

## OUR SERVICES

E2i's professional team of engineers and technicians specialize in developing project-specific CP and MCC solutions that suit the need of our clients. Through comprehensive designs, fabrication, and on-site support, our value lies in exceeding our customer's expectations in quality and service.

- Control panel design includes full set of AutoCAD drawings, conversions, and revisions
- Layout and system schematic drawings
- Control panel fabrication and retrofitting
- Cloud-based drawing management
- Control system installation support and on-going maintenance
- PLC/HMI programming
- System documentation, testing and commissioning

You can depend on our insight and substantial interaction to quickly identify and solve problems to reduce costs and complete projects on time and within budget.
